Introduction

Passionate Web Developer with experience building responsive and modern web applications using Angular. Familiar with creating clean user interfaces, working with APIs, and developing frontend features with a focus on performance and user experience. Also have basic experience with backend development using Django REST Framework. In addition to web development, I have an interest in 3D art and rendering, which helps bring creativity and visual design skills into my projects. Always motivated to learn new technologies, improve my skills, and work on creative and challenging projects.

Education

2020 – 2021 OFPPT (Office de la Formation Professionnelle et de la Promotion du Travail), Diploma in Software Development

Skills

Frontend Development – HTML, CSS/SASS, JavaScript/TypeScript, Angular.

Backend Development – Python, Django/Django REST Framework

Game Development – C++, Unreal Engine, Blender

Projects

10/2025 – 01/2026 **E-Commerce Web Application** 🔗
• Developed a responsive e-commerce web application during my internship at Majal Berkane using Angular. Worked on reusable UI components, product pages, API integration, routing, and improving user experience while collaborating within a professional development team.

02/2025 – 07/2025 **EcoGeste – Back-office Management System** 🔗
Worked on the EcoGeste back-office system during my internship at Majal Berkane using Angular. Developed admin dashboard features for managing products, rewards, and application content, including adding, updating, and removing items through API integration.

AI-Powered Resume Builder 🔗
Developed an AI-powered Resume Builder web application using Angular and Django REST Framework. Integrated AI APIs to help users generate and improve resume content, while working on responsive UI design, dynamic forms, and API integration.

Certificates

- Technical Support Fundamentals 🔗
- Bits and Bytes of Computer Networking 🔗
